

AWEX-G Forecast for Sunday, Nov. 9 (Nov 10 UT)

Forecast (updated 6:55pm CST): Very cloudy. Cloud bases still low, around 2000 feet. Wind speed below 10mph. **Not much change in the outlook tonight, except no precipitation.**

Synopsis: 00Z surface analysis: Front still stationary out to the west in N.Mexico and Colorado.

OK mesonet: Light SE winds. Temps in the mid- to high-40s with dewpoint spreads of about 5 degrees.

Grant County forecast: Tonight. Cloudy. Patchy fog then areas of dense fog after midnight. Lows in the mid 40s. South winds 10 to 15 mph.

RUC cloud forecast: Scattered low clouds in vicinity all night.

Observations at SGP@00 Z: Cloudy.

Decisions made at the 7pm AWEX-G meeting:

1) Cloudy! Decided to see if it clears before we decide NO-GO. If we get a break we may try the 90/92/Intermet and CUFH

What actually occurred?

1) Released CUFH and 90/92/Intermet (even though there were low level clouds).

Lidars

No SRL data tonight.

CARL ran throughout.
